Art Unit:

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-11, and 22-40 drawn to treating diabetes by therapeutically administering various compounds impairing the mitochondrial Ca/Na anti-porter.
- II. Claims 12-18, drawn to a method for detecting various peptide compounds impairing the mitochondrial Ca/Na anti-porter.
- III. Claims 1-11, and 22-40 drawn to a method for isolating various peptide compounds impairing the mitochondrial Ca/Na anti-porter.

Claims contained in Group I is directed to therapeutic methods employing a plurality of patentably distinct compound species. Applicant is required under 35 U.S.C. § 121 to elect a single disclosed compound species, employed to practice the claims of the invention group chosen. Additionally, Applicants are required to present a claim directed to this therapeutic method, employing the single compound species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable

Art Unit:

over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

The above delineated inventions differ as unrelated therapeutic methods; and are independent and patentably distinct each from the other. The grouped inventions patentably distinct, a reference which would anticipate, or make obvious, the inventions of groups I-III would not necessarily obviate or anticipate the inventions in the other group. The searches are not co-inclusive as indicated by the diverse nature of the subject matter, thus, would represent an undue burden on Examiner. One skilled in the art would readily practice the invention of one of the above groups with out infringing and or practicing the invention of another group. The subject matter is unique and has acquired a separate status in the art and is fully capable of supporting separate patents. For the foregoing reasons restriction is proper for examination purposes.

Applicant is reminded that upon the cancellation of the claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48 (b) if one or more of the currently named inventors is no longer an inventor if at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48 (b) and by the fee required under 37 C.F.R. 1.17 (h).
